

Tangipahoa School District chooses Tools4ever's UMRA for user account management

Lynbrook, NY, September 20, 2011 - Tools4ever, the market leader in Identity and Access Management solutions, is pleased to announce that Tangipahoa Parish School District has implemented User Management Resource Administrator (UMRA). Tangipahoa Parish School District is located in Louisiana and encompasses 37 schools ranging from kindergarten to 12th grade. The district implemented UMRA in order to automate the process of placing their 14,000 users in the appropriate security groups to insure that students, faculty and staff are able to access the resources they require, such as e-mail applications and the school information system.

Before UMRA, Tangipahoa had difficulty keeping track of changes being made to accounts due to the frequent movement of students between their two year schools. The district also has a small IT department that was not able to keep up with all of the account management demands. This resulted in several departments making their own changes and a lack of communication. Now with UMRA in place, HR is able to easily make necessary changes using UMRA delegated forms. UMRA recognizes the changes and automatically processes these changes in the network. The HR department is the only group that handles the account management so that the IT department can focus on more important issues, such as technology in the classroom.

Mike Diaz, Assistant Director of Technology stated, "It is 100% hands off for the Technology Department now for user account management. Just having it done once and done correctly has allowed us to expand what we're doing educationally."
